Dermatologic Therapies, Part 1

Dean S. Morrell, MD; and Craig N. Burkhart, MD

Guest Editors

Primary care pediatricians frequently see patients with dermatologic symptoms, ranging from acne to more serious disorders. What's the best way to treat these conditions? What options should be considered during the course of treatment?

311 Use of Isotretinoin for Acne Vulgaris

The benefit of isotretinoin in a disease that can have a permanent detrimental effect on well-being is unquestionable; but it is also a potent teratogen with possible association with idiosyncratic cases of depression and suicide.

Bradley Merritt, MD; Craig N. Burkhart, MD; and Dean S. Morrell, MD

321 Molluscum Contagiosum: What's New and True?

Providers have varying opinions about molluscum contagiosum and its therapies; there is a constant circular argument about the best treatment because of lack of sound scientific evidence to support any particular treatment.

Jacquelyn Coloe, MD; Craig N. Burkhart, MD; and Dean S. Morrell, MD

326 Pediatric Infestations

The primary care physician should consider louse infestation and scabies in the differential for pruritic dermatoses.

Stephanie A. Diamantis, MD; Dean S. Morrell, MD; and Craig N. Burkhart, MD

333 Therapies for Pediatric Seborrheic Dermatitis

Physicians should become familiar with pediatric seborrheic dermatitis, including the various clinical presentations in infants and adolescents, and the numerous available treatments.

Gabriele B. Poindexter, MD; Craig N. Burkhart, MD; and Dean S. Morrell, MD

339 Vitiligo: Treatment Approach in Children

Vitiligo is relatively easy to diagnose but difficult to treat.
